

I am sending this comment to oppose the weakening of the restrictions for the "No Call List". I do NOT like to be bothered by anyone whom I have not contacted for information and I believe it is more of a violation of individuals rights for companies to call people in the evenings with solicitations and surveys than for the companies NOT to have the right to BOTHER people. I used to get bothered by 3-5 callers every night at home, during dinner, or family time with solicitations or surveys before I got on the "No Call List". I have had a lot more peace in the evenings. Do not take MY RIGHT to peace and quiet with my family just so companies can harass people for money. Thank You!
